

Printing Fedex Certification Labels

Printing FedEx Certification Labels

In order to print production FedEx labels you must first certify your account with FedEx. In order to certify your account you must produce a series of test labels with your Test Environment credentials, print them out and mail them to FedEx along with their paperwork. After you've obtained your test environment credentials place them on file under:

[Main Menu](#) [Configuration](#) [Shipping](#) [Shipping Specific Options](#)

Below is a screen shot of the FedEx section of the shipper specific options.

The screenshot shows a web interface for configuring FedEx shipping options. The breadcrumb trail is: Home → Configuration → Shipping → Shipping Specific Options. A navigation bar contains: Distribution Centers, Checkout Options, Methods, Packages, Shipper Specific Options, Destination Restrictions, and InsureShip. The main section is titled 'FedEx' and contains a form with the following fields:

- Account Number
- Meter Number
- Web Service Authentication Key
- Web Service Password
- Web Service Environment: production
- SmartPost Hub Id
- Rating: Discounted
- Sender Company
- Sender Address Line 1
- Sender Address Line 2
- Sender City
- Sender State
- Sender Postal Code
- Sender Country: United States
- Sender Phone Number
- Sender Label Type: 4x6 (with checkbox for packing slip with 4x6 label)
- Signature Type
- Print on Label Reference

A red box highlights the entire form area. A red text annotation on the right side of the form reads: "Fill out this section with your test environment credentials. Make sure you select 'test' for your Web Service Environment. Then click on the generate certification labels". At the bottom of the form, a button labeled "generate certification labels" is also highlighted with a red box.

After you have completed filling out the credentials, ship from address, etc. click on the Generate Certificate Labels button at the bottom of the section. The certification screen will appear with a series of blank scenarios that you can configure. For your convenience there is a stock test scenarios button at the bottom. Click on the button as shown in the screen shot below.

Click on the generate labels button to product the PDF file. Print the PDF file to your thermal label printer and submit the labels and other required documentation to FedEx.

If you received an error on the PDF, make sure that you have the proper credentials for the TEST environment on file and did not make a copy paste error.
